

AEROSOL TECHNOLOGY

Quite fast. Not many other manufacturers equip aerosol cans with valves with riser pipes at such a high output rate. Of course, an ATEX approval is possible if needed. That way you can use our aerosol technology for as many applications as possible.

OUTPUT OVERVIEW

- Output up to 2,000 caps per minute and 400 cans per minute
- A wide range of articles is available (cans Ø 10 - 200 mm)
- Easy to change over to other products
- Changing the format parts without tools
- Integration of existing conveyor systems
- Careful product handling
- Integration of additional inspection functions and reject procedure of flawed products feasible
- Power-operated height adjustment optional
- Adaptable to the individual customer's needs
