

ELEVATORS

Things are looking up again. This machine conveys lids, screw caps, pumps and so on upwards to be sorted, screwed, plugged or processed otherwise. Any components are usable in the Tölke elevator. We have designed it in a way that it is able to transport many different parts. Almost an all-rounder.

OUTPUT OVERVIEW

- Output up to 2,000 caps per minute and 800 bottles per minute
- Hoppers from 50 liters to 30,000 liters can be used for storing bulk material
- No pressure exerted onto the bottles/caps through mechanical forces
- Possibility of revisional operation for emptying residual bulk material
- Low noise level
- No change of format parts for different bulk materials
- Low infeed level
